

Employee Handbook and Company Policies

Fictional Sample Company — RAG Knowledge Base Document

Document Purpose

This document contains fictional employee records and company policies created for a Retrieval-Augmented Generation (RAG) application. The information is intended for software development, testing, document chunking, embedding, vector search, and question-answering experiments. All employee names, employee IDs, policies, and organizational information in this document are fictional. This document is not legal, employment, insurance, tax, or human-resources advice.

1. Employee Directory

The company has employees working across Engineering, Sales, Administration, Human Resources, Finance, Information Technology, Marketing, and Operations. Employee records contain basic information such as employee ID, employee name, department, job title, work location, manager, years of experience, skills, employment type, vacation eligibility, and insurance plan. The employee directory can be combined with the company's policy documents to answer questions that require both employee-specific information and company-policy information.

EMP1001 — John Smith

Department: Engineering

Job Title: Senior Software Engineer

Location: Dallas, Texas

Manager: Michael Brown

Years of Experience: 8 years

Employment Type: Full Time

Vacation Eligibility: 20 days

Insurance Plan: Standard

Daniel Taylor works as an Account Executive in the Sales department. His responsibilities include customer relationship management, business development, sales negotiations, and account management.

2. Vacation and Paid Time Off Policy

The company provides paid vacation time to eligible full-time employees to encourage rest, personal time, and sustainable work practices. Vacation eligibility is based on completed years of service. Employees with zero to two completed years receive 15 vacation days per calendar year. Employees with three to five completed years receive 20 vacation days per calendar year. Employees with six to ten completed years receive 25 vacation days per calendar year. Employees with more than ten completed years receive 30 vacation days per calendar year.

Vacation requests should normally be submitted through the company's time-off system at least five business days before the requested start date. Managers review vacation requests based on staffing requirements, project deadlines, customer commitments, previously approved absences, and business needs. Employees should not assume that a vacation request is approved until the request has been formally approved in the company time-off system.

Employees may carry forward up to five unused vacation days into the next calendar year unless a different arrangement has been approved by Human Resources. Carry-forward vacation days should normally be used before the end of the first quarter of the new calendar year. Vacation policies may be subject to applicable employment laws and individual employment agreements.

Employees who plan extended vacations should communicate with their manager in advance and make appropriate arrangements for project responsibilities and customer commitments. Managers may ask employees to document important work information before beginning an extended vacation.

3. Sick Leave Policy

Eligible full-time employees receive up to 10 paid sick days per calendar year. Sick leave may be used for an employee's illness, medical appointments, recovery, or other qualifying health-related needs. Employees should notify their manager as early as reasonably possible when they cannot report to work.

When an absence continues for multiple consecutive working days, Human Resources may request appropriate documentation consistent with company policy and applicable law. Employees should communicate with their manager and Human Resources when an illness requires an extended absence or additional workplace accommodations.

Sick leave should not be used as a substitute for vacation when an employee is taking planned personal time. Employees with an extended absence should work with Human Resources to understand available leave programs, documentation requirements, and return-to-work procedures.

Unused sick leave is not automatically converted into vacation days. Sick leave eligibility and treatment may vary according to applicable law, employment classification, and company benefit programs.

4. Health Insurance Policy

Eligible full-time employees may participate in the company's health insurance program after satisfying applicable waiting-period and enrollment requirements. The company offers Standard and Premium medical plans. The Standard plan generally has a lower employee contribution and a higher deductible, while the Premium plan generally has a higher employee contribution and a lower deductible.

Employees may also elect available dental and vision coverage during the applicable enrollment period. Dependent coverage may be available according to the terms and conditions of the selected insurance plan.

Employees are responsible for reviewing insurance plan documents before selecting coverage. The company may contribute a portion of an employee's medical insurance premium, while employees are responsible for their designated contribution and applicable deductibles, copayments, and coinsurance.

New employees generally have an initial enrollment period after becoming eligible for benefits. Existing employees may change coverage during the annual open-enrollment period or after a qualifying life event.

Questions regarding claims, provider networks, covered medical services, deductibles, or insurance cards should be directed to the applicable insurance carrier or the Human Resources benefits team.

The official insurance plan documents control if there is any difference between a general description in this handbook and the actual plan terms.

5. Employee Benefits and Eligibility Policy

Benefits eligibility is determined by employment classification, length of service, and the terms of the applicable benefit plan. Full-time employees generally have access to medical insurance, paid time off, sick leave, and other company-sponsored benefits.

Contractors, interns, temporary employees, and other non-full-time workers may have different benefit eligibility requirements. Employees should review their employment agreement or contact Human Resources if they have questions about benefit eligibility.

Benefit plans are governed by their official plan documents. If a summary in this handbook differs from the official plan document, the official plan document controls.

Employees should notify Human Resources when they experience a qualifying life event that may affect their benefits. Examples may include marriage, divorce, birth or adoption of a child, or loss of other qualifying coverage, subject to the applicable plan rules.

6. Promotion Policy

Employee promotions are based on demonstrated performance, role expectations, business needs, skills, leadership behaviors, sustained contribution, and readiness for the responsibilities of the next position. A promotion is not determined solely by years of service.

Managers are expected to provide employees with feedback regarding current performance, future role expectations, development opportunities, and areas requiring improvement. Employees interested in career progression should discuss their development goals with their manager.

For technical employees, career progression may include Software Engineer, Senior Software Engineer, Staff Software Engineer, and Principal Engineer. Each level has progressively broader expectations relating to technical knowledge, system ownership, architecture, leadership, mentoring, communication, and organizational impact.

Staff-level engineering responsibilities may include ownership of complex systems, architecture contributions, cross-team collaboration, mentoring engineers, technical decision-making, design reviews, and delivery of projects with significant organizational impact.

Promotion decisions may involve manager recommendations, performance reviews, peer feedback, demonstrated skills, business requirements, and available positions. Meeting some requirements does not automatically guarantee promotion.

7. Remote Work Policy

Eligible employees may work remotely when their role, team responsibilities, and business requirements permit
